General What is Neo? Neo is a distributed network which utilizes blockchain technology and digital identity to digitize assets and automate the management of digital assets using smart contracts. Neo network has two tokens, NEO, representing the right to manage Neo blockchain and GAS, representing the right to use the Neo Blockchain.

What developer communities does Neo have? Neo has a large number of worldwide developer communities that have been contributing to Neo development and ecosystem growth for several years.

COZ (Global) - Neon Wallet, Neon.js, Dora, Mamba, Boa NeoResearch (Brazil) - Core development, NeoCompiler Eco, neo-cpp-core NSPCC (Russia) - NeoFS, NeoGo AxLabs (Switzerland) - neow3j, GrantShares NEXT (China) - NeoLine, NeoTube NEO Tracker (US) - NEO Tracker, NEO·ONE Red4Sec (Spain) - Core development, cybersecurity/auditing Neo News Today (Global) - Neo News, nDapp, GasBot

What is GAS? GAS represents the right to use the Neo Blockchain. All transactions require GAS fees.

Neo uses delegated Byzantine Fault Tolerance (dBFT) consensus algorithm, providing full finality with no forks.
